POWER AFRICA MODELLING TOOL

Just attended a 90minute webinar conducted by USAID and Power Africa on PAYGO financial modelling tool. Extremely well put together.

Read More at: <https://www.usaid.gov/powerafrica> and <https://persistent.energy/>

INVESTOR LIST

How about this for a good read.

<https://climatetechvc.org/a-running-list-of-climate-tech-investors/>

STARTUP ENERGY TRANSITION WEBSITE

This is an incredibly active organization. Well worth the time to participate.

<https://www.startup-energy-transition.com/>

SOLAR IMPULSE FOUNDATION

Just a reminder of our solution recognition.

<https://solarimpulse.com/efficient-solutions/hydrokinetic-turbine>

HYDRO EMPOWERMENT NETWORK

They have released their Q4 newsletter, featuring member updates from Ethiopia, Madagascar and Nepal, as well as thematic features, namely Earth Voices, Hidden no More, and a SEED reflection.

Check it out for updates and insights on social enterprise, local manufacturing, watershed strengthening, and other core elements of resilient community-scale hydropower! You can read the newsletter here: <https://bit.ly/38Q6Xx2>

Please go to page 2.....

ECOSYSTEM LAUNCH

We have formed a cohort with two companies from Africa to form Bridge Gap Power.

Itech Energy Co. Ltd. <https://itechenergy.co/>

Environ-Waste Nigeria Limited. <http://environwaste.com/>

Their combine knowledge of Africa and initially the Niger Delta will provide a great leap ahead for our efforts to use hydrokinetic turbines for productive power.

Please check our website coming soon and register for their newsletter.

PRODUCTIVE POWER

Remote communities cannot effectively build sustainable productive energy models without finance and the ability to access the internet. If we provide power for productive uses this can help pay for solutions.

PAY-AS-YOU-GO

We intend to build a financing model to allow communities to acquire renewable energy solutions. We will work with Power Africa, USAID, PFAN and other organizations as well as utilize equity crowdfunding for remote community projects.

NEW INITIATIVE

We have a new Green Technology project with Revolution Turbine Technologies. We have formed a new company together in Canada to assist with entrance into the Canadian market. More to come in February. <https://revolutionturbines.com/>
